Beam Placement for the New Flyover Bridge at State Road 85N/123 Intersection

Chipley – The State Road (S.R.) 85N southbound lanes at the S.R. 123 intersection in Okaloosa County will encounter brief intermittent lane closures from 8:30 a.m. to 10 a.m. Friday, July 31 as crews place the first sets of structural steel beams that will support the new flyover bridge. Once overhead activities are complete, traffic will return to the normal detour pattern. Drivers are reminded to be alert to slowing traffic and be prepared to stop.

Construction activities are weather-dependent and may be delayed or rescheduled in the event of inclement weather. Motorists, pedestrians and bicyclists are reminded to travel with care through the work zone and to watch for construction equipment and workers entering and exiting the roadway.

The latest project information is available on Facebook. Clicking “Like” on the facebook.com/StateRoad123 construction page is the fastest and easiest way to stay informed about scheduled lane closures and other construction-related impacts. You may also text the keyword “StateRoad123” to 313131 from your mobile device to receive text alerts.
